1. Attached is a [REDACTED] copy of Technical Report No. U 50086R entitled "Berechnungsmethoden für Hochspannungsschalter", as prepared for the Technische Abteilung MEP, Büro für Hochspannungsapparatebau. This report, prepared by O. Mayr, M. Böttger, and R. Grämer, is composed of 168 pages plus appendices and diagrams. It was reportedly prepared in 1948, and represents some of the latest developments in German high-voltage theory.
2. This report is sent to you for retention in the belief that it may be of interest.

The accompanying subject document, a detailed theoretical consideration of some of the important high-voltage problems, is believed to merit evaluation by fully qualified USA commercial experts.

Although some investigations of this nature are carried on in USA universities, the bulk of the work is being done in the various leading commercial electrical apparatus manufacturers' laboratories.
